## *Food Facility Expansion Completed*

Meridian Design Build has completed an 84,000-sq.-ft. facility expansion for Kerry Ingredients & Flavours at 3141 W. North Avenue in Melrose Park. The project included demolition of an outdated 100,000-sq.-ft. two-story masonry, timber, and cast in place concrete structure. Improvements within the addition included insulated metal wall and ceiling panels, mechanical and lighting systems, and sanitation stations. Ben Runkel, project manager, and Tom McNett, senior superintendent, coordinated the project for Meridian. Harris Architects provided architectural and structural engineering services, and Jacob and Hefner Associates acted as civil engineer.
