

Stockyards: Not Just for Meat Anymore

Meridian Design Build recently completed the construction of a 38k-SF facility for drywall supply company **Gypsum Supply Company** at Stockyards Industrial Park. **Cornerstone Architects Ltd.** and **SpaceCo Inc.** also worked on the project, which includes green elements like a **TPO roof** (which you could probably tell by looking at it) and 92% recycled construction materials. Gypsum Supply took occupancy earlier this summer.
