

BUILD, DESTROY, BUILD

Meridian Design Build is working on an 84k-SF addition for **Kerry Ingredients & Flavours** at 3141 North Ave in Melrose Park. It'll bring the 113k-SF space up to **197k-SF** and includes the **demolition** of an outdated 130-SF two-story building on the site. Meridian will crush and recycle **6k tons** of concrete from the demolition. Associate project manager **Ben Runke** and senior superintendent **Tom McNett** are leading the project for Meridian. **Harris Architects** is providing architectural and structural engineering services. **Jacob and Hefner Associates** is the civil engineer. That's not to say Harris isn't civil. From all indications, they're **very well behaved**.
