New Construction

Meridian Awarded Healthcare Project

Meridian Design Build was selected to complete renovation and addition work associated with a 14,626-sq.-ft. facility for Barrington Orthopedic Specialists at 120 E Higgins Road in Elk Grove Village.

Construction is currently underway on the project which includes the full renovation of an existing single story office building to accommodate new exam rooms, cast rooms, imaging areas, rehabilitation facilities, and a physical therapy gym. A building addition is being constructed to accommodate waiting areas and a covered patient entrance/drop-off.

Bob Kolcz, project manager and Fred Jennings, general superintendent, are coordinating the project for Meridian. Areté-Knight is providing design services including architectural, structural, MEP/FP, and interior design under separate contract with the client.
