DESIGN BUILD

Meridian Design Build is a full-service construction firm that specializes in coordinating the design and construction of warehouse/distribution, manufacturing, office, commercial, and food and beverage facilities.

We offer a wide range of construction planning and management services from site due-diligence, infrastructure development, conceptual layout, and budgeting through to project completion and facility turnover. Our experienced team of

in-house professional project managers has worked with build-to-suit users and major developers on projects ranging in size from 15,000 square feet to over 1,000,000 square feet.

Meridian Design Build is committed to understanding the needs and objectives of our clients in order to allow us to work on their behalf. This is to ensure that the highest possible level of service is provided with respect to cost control, schedule, project delivery, and quality control every step along the way.
