

**Meridian Design Build LLC has broken ground on a 364,000-square-foot cross-docked/rail-served expansion to the speculative distribution center it completed earlier this year for DP Partners and the Village of Sauk Village at 21700 Mark Collins Drive in the new LogistiCenter® at Sauk Village Industrial Park. The project has leased 308,000 square feet of the existing facility to Warehouse Specialists, Inc. The design team includes project architect, Harris Architects, and Jacob and Hefner Associates, civil engineer. The CB Richard Ellis team of George Maragos, vice president, and Scott Duerkop, senior associate, is the exclusive leasing agent for the center.**
